

## Technical Seminars

### Technical Seminars Overview

**The Acoat® selected Technical Seminars consists of high quality, instructor-led practical education with processes and technology.**

*"The technical seminar that we held in our bodyshop on aluminium welding and high strength steels helped to ensure that the repairs are carried efficiently according to manufacture specification and the integrity of the vehicle safety systems"*

Craig Raxworthy - Owner  
Raxworthy Auto Body Repairs  
Christchurch - NZ

Technical seminars have been designed to help keep the bodyshop owner and panel and refinish technicians up to date with the latest techniques and technologies. This enables them to make informed decision on how to improve the shop performance. They cover all key technical areas of the Bodyshop.

We understand the value of your team's time and the need to keep your staff in the body shop performing their work. Therefore, the classes are modular in format and are delivered locally. This format minimises time away from the business and enhances the implementation of new concepts and best practices that are taught.

A wide variety of courses are offered to give your entire staff the skill and knowledge they need to produce exceptional results. All courses offer best practices specific to the collision repair industry and suggestions for each of the key processes found in leading collision repair businesses.

Content for the Acoat® selected Technical Seminars are carefully planned to:

- ◆ Ensure relevance
- ◆ Improve efficiency
- ◆ Reduce costs
- ◆ Foster implementation

Technology in vehicle construction and repair technique continue to evolve at an every increasing pace, so keeping up to date is a must.

### Why We Are Different!

All instructors are either Akzo Nobel employees whose only responsibility is technical improvement for our customers or industry specific experts. This interprets into great depth of knowledge and greater learning for students.

- ◆ Wide scope of subjects covered
- ◆ Industry specific subject matter
- ◆ Implementation assistance available - you are not left to implement changes alone
